

CoinPouch

Privacy Policy

- Core Policies
 - A. We believe in protecting user privacy.
 - B. We do not require any personal user details such as email or name.
 - C. We do not have access to your funds or private keys.
 - D. We do not require users to login or register.
 - E. In the future, if we add integrations such as Coinbase supplying personal information may be required to use third party services.
This will always be optional and at user discretion if they want to use additional services and third party integrations which may require user information.
- Private Keys (The password to your blockchain wallets)
Your private keys are securely encrypted to your device using native Apple best practices.
- User Information
Personally identifying information is not collected as any part of core services and third party integrations which we may offer in the future which may require user information on an opt-in basis is never collected in our analytics or servers.
- Camera images stay on device.
We do not store or retain camera images. They never leave your device.
- Device Location
Device location is not tracked or used in any part of this application.
- Transactions
Your transactions initiated from this application will be visible to the public as this is the nature of blockchain based distributed ledgers.
- Security
We only transmit transactions over HTTPS.
- Analytics

We do have analytics integrated to help improve our application and provide a the best service possible. Our analytics do not include or collect any user information such as name and email.

- User Support

By contacting our support users may incidentally supply personally identifying information such as their email or name. We will endeavor to keep this information secure and confidential.

- User Responsibility

We provide an application interface which enables users to create blockchain wallets, store funds and initiate transactions. We do not have access to blockchain wallet accounts users create through this application. Coin Pouch and Touch Titan Labs, LLC are not responsible for any funds stored, sent or exchanged through this application.

We recommend users follow best practices to secure their wallet:

- Never access your wallet on a public wifi.
- Save your private keys in a safe place written down.
- Never share your private keys with anyone.
- Use of adult sites exposes users to risk of compromising their information.
- Use a VPN client whenever accessing your blockchain wallets for an added layer of security.

- Third-party Services

The Exchange feature within CoinPouch uses Changelly to allow exchanges which you may chose to use. If you do elect to use this service there may be other terms or privacy policies that apply.
